WHOLE HOME AUTOMATIC SEDIMENT FILTER

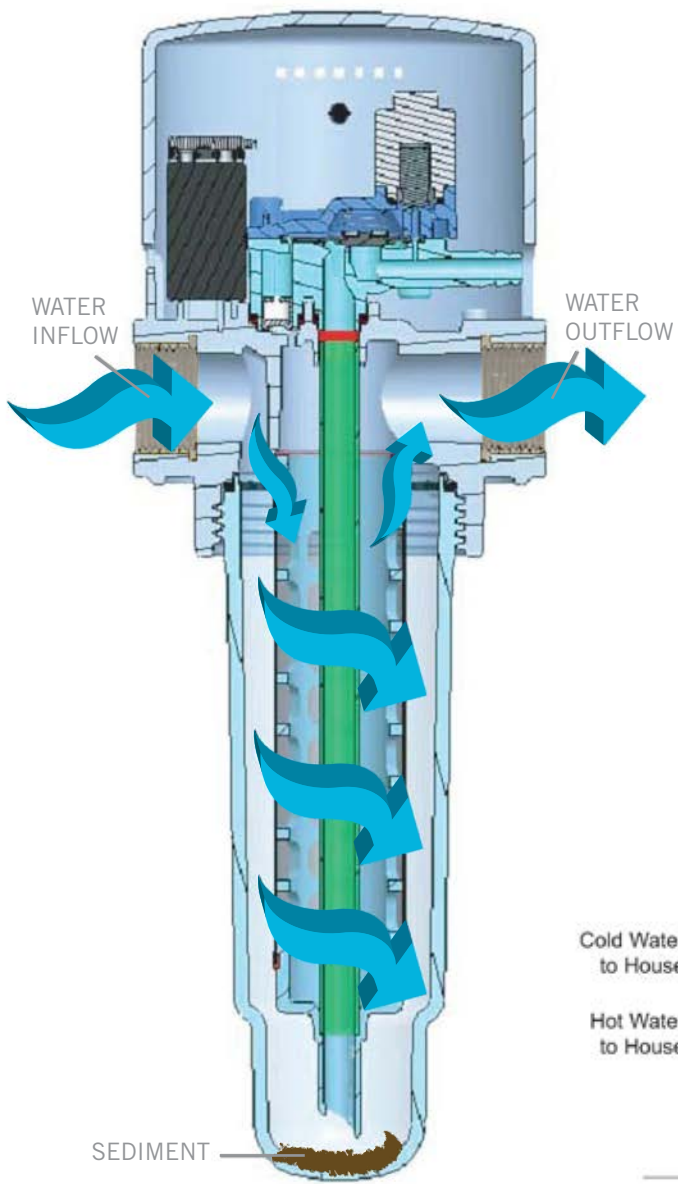

PRODUCT FEATURES

- Point of Entry
Intended to filter water for entire home
- Rated 35 gpm
- Self-Cleaning
Effectively rinses loose particulate from the filter screen
Minimal pressure drop due to dirty/plugged filters
Programmable cleaning
Backlit LCD display shows number of days until next clean cycle
- Battery Operated - 9V
Optional 110 volt transformer
Low battery indicator
- Stainless Steel Threaded Inserts
1" NPT pipe thread
Avoid stripping plastic threads
Universal connections
- Large Capacity Filter Screen
More screen area for less pressure drop
Longer interval between cleaning
Filter can be manually cleaned by using the Clean Now button
- Filter Screens
Heavy-duty stainless steel screen
Three mesh sizes available to fit all applications
60 micron standard
- Clear Sump
Allows viewing flow, sediment removal and auto clean feature
- Includes All Necessary Installation Equipment
Drain Line - 3/8" I.D. x 10 ft.
Battery
Bracket

FILTRATION SOLUTION

Whole Home Sediment Filter

The EcoPure® Automatic Sediment Filter (ASF) is a revolutionary system that filters the water for your entire home and even cleans its own filter. With the ASF there are no filters to replace and it doesn't interrupt or diminish your water pressure.

The ASF connects to the main water line as it comes into your home. And by filtering sediment from all your water, other appliances like your water softener, water heater, washing machine and dishwasher will perform better and last longer.

PLUMBING LOCATION
